The undersigned thanks Examiners Banh and Colilla for the time and courtesies extended during the telephone interview on 24 February 2009. The teachings of the Thompson et al. Patent, particularly the heating of transfer roll 24 with radiant heat from lamp 30, were discussed. The undersigned argued that in the claimed invention the transfer medium is not heated, but cooled, to provide the recited lower temperature in the transfer zone.

The Examiners said they would consider the claims in view of the remarks. No agreement was reached.

Respectfully submitted,

Mark D. Swanson
